

TECHNICAL DATA SHEET

ND Erosion Protection Profile

ND Erosion Protection Profile

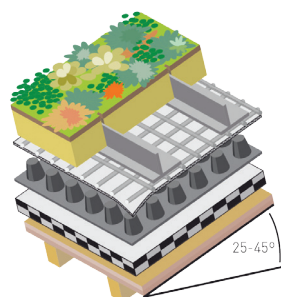

The ND Erosion Protection Profile is a rigid plastic profile with a construction height of approx. 45 mm. The profile has punched, slotted holes for fixing the ND Erosion Protection Profile with the ND Fixing Clip to the ND ESG-40/40 Erosion Protection Grid. The profile will hold the ND SM-50 Substrate Panels in place.

Application

The ND Erosion Protection Profile is a component of the Nophadrain Extensive Green Roof System – steep pitched roof.

Properties

- Material: polyvinyl chloride (PVC)

Composition Nophadrain Extensive Green Roof System – steep pitched roof

| Product | Dimensions (L x W) | Packaging |
|-------------------------------|----------------------------|-------------------------------------|
| ND Erosion Protection Profile | approx. 2,000 x 90 x 45 mm | approx. 20 m, 10 pieces, package |
